

Hey there – interested in moving science forward while getting paid for something you throw away every month?

You can be part of building a simple, safe way to help diagnose

ENDOMETRIOSIS & **ADENOMYOSIS**

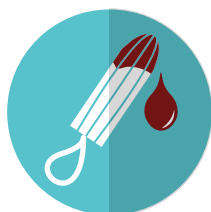

NEXTGEN JANE ®

WHAT ARE WE STUDYING?

Endometriosis is currently diagnosed by surgery and adenomyosis by imaging. NextGen Jane is working on a way to look for molecular signals in the endometrial lining you shed naturally, every month, as an alternative to surgery or imaging for detecting disease.

ARE YOU ELIGIBLE?

If you are planning to have surgery to diagnose endometriosis or you are having / have had imaging (MRI, ultrasound or CT scan) to diagnose adenomyosis, you are eligible to participate in this study.

WHAT IS REQUIRED

Wear an all organic cotton tampon for up to 4 hours, 2 or more times during your period

COMPENSATION

You will receive a \$25 gift card for every tampon you provide (up to \$300) but the biggest thing we can offer you in return for your contribution is the ability to help us advance female reproductive care.

INTERESTED?

If you're interested in participating in this study, scan the QR code below and we'll send you more information! Or email us:
